PROFESSIONAL EXPERIENCE

Aspiring full-stack web developer skilled in Java, Python, C, SQL, and the MERN stack. Strong at building responsive web applications, solving technical problems, and learning new technologies quickly. Looking for opportunities to apply development skills and gain real-world experience.

PROJECTS

1. File Converter Web Application

- Converts files between formats like PDF↔Word and Images↔PDF.
- Built using Python/Flask, JavaScript, HTML, and libraries for file processing.
- Shows skills in backend logic, file handling, and creating useful real-world tools.

2. Real-Time Weather Detection System

- Displays live weather data for any possible location.
- Developed using Weather APIs, JavaScript (fetch), HTML/CSS.
- Reflects strengths in API integration, data extraction, and dynamic UI updates.
